SUMMARY

I am a skilled full stack software engineer with experience in building full stack applications using modern frontend, mobile and backend stacks such as Javascript/Typescript/React, Swift/UIKit/SwiftUI, Node/ExpressJS, PHP/Laravel, Python/Django, Go/Gin. with years of experience working with frontend, backend database and cloud technologies to build scalable and fast web products.I love to keep up with the latest technology updates to ensure that products i work on are using the best and most secure stack.

TECHNICAL SKILLS

- JavaScript
- Typescript
- jQuery
- React/NextJS
- Networking
- Vue/Nuxt
- Git/GitHub
- HTML5
- CSS3
- Python/Django
- Bootstrap
- Tailwind CSS
- Vite
- Swift/UIKit/SwiftUI (iOS)
- Xcode
- React Native
- Firebase
- NodeJS/ExpressJS
- MySQL
- PHP/Laravel
- CI/CD
- Golang/Gin
- Unit and Integration Testing
- Rest APIs
- MongoDB
- Docker
- Kubernetes
- Linux
- Ansible
- Jenkins
- Maven
- Terraform
- AWS
- Bash Scripting
- Code Interpretation / Debugging

WORK EXPERIENCE

Wayne Create
May 2023 - Present
Full Stack Engineer

- Worked with design and project manager to create/maintain over 10 web products.
- Optimize web applications for maximum speed and scalability.
- Improve the SEO ranking and the website accessibility score of various web products to ensure the website ranks on the first page of google and other search engines.
- Write application documentation to help reduce the code familiarity period for myself and other engineers.
- Participate in meetings to ensure there is clear understanding in product development and the whole team is on the same page as well as share development progress.
- Develop and maintained high performance backend systems using good coding practices and modern technologies including Laravel, Node/ExpressJS etc.
- Design and build relational and non-relational database systems for backend applications.
- Write unit tests to detect bugs and prevent them from getting into the production environment.
- Build fast and responsive APIs and backend services to power the frontend using Node.js/Express.js and PHP/Laravel.

Develop IT

Web Developer

July 2022 - February 2023

- Wrote clean, readable and maintainable code to build beautiful responsive websites and web apps that satisfied the needs of customers.
- Build, responsive and beautiful UIs using React, CSS3, JavaScript, Bootstrap and Tailwind CSS.
- Build fast and responsive APIs and backend services to power the frontend using Node.js and Express.js.
- Communicate regularly with customers to better understand their needs and provide solutions.
- Build top-quality, high performing, accessible and inclusive user interfaces, functionality and products.

Process and Plant Automation

Project Compliance Officer

June 2022 - Feb 2023

— Ensure that all projects meet the set regulatory and industry standards.
— Regularly communicate with clients to ensure that project execution meet their requirements.
— Ensure that all project execution documents are submitted at all stages of the project execution from initiation to closing.
— Work together with Project consultants and project managers to ensure that projects are execution is well documented.

EDUCATION

Takoradi Technical University

Electrical and Electronics Engineering

November 2018

Udemy

- NodeJS/ExpressJS   - React
- PHP&Laravel   - Clean Code
- Swift/SwiftUI   - React Native
- DevOps/AWS   - Python & Django
- Go   - Docker/Kubernetes

PROFESSIONAL SKILLS

— Excellent Communication skills
— Team Collaboration and support

— Excellent Customer Service
— Great attention to detail
— Excellent researching skills

— Documenting and Organization
— Cloud Technologies

HOBBIES

— Reading
— Playing and watching football
— Gaming

LANGUAGES

English – Native / Bilingual

Japanese - Conversational
